## Content for a Company Logo

This is a document that will provide us with all the information we need to create your company logo. Please note that this is just a set of guidelines to help us gather information. There are no strict set rules for creating a company profile. We can be creative as we want! Please fill in the information below and feel free to add any additional information.

Please note that this information will be kept private and will not be shared with anybody outside of this project.

### Things we'll need to create your company logo:

- Full Company Name.
- Company Slogan.
- Specific colours you want to use on your logo.
- If you have a drawing of some sort or an idea of what you want your logo to look like, please send us a picture of it. Our artists are great at creating logos from ideas and drawings. (not necessary)
- Please list any special requests you would like to add to your logo.
- Describe the theme you would want your logo to look like. (professional / playful / minimalistic, etc.):

### What to expect:

- We usually take about 1 weeks to create your logo.  
Remember (time invested) + (more time invested) = great results.
- You will receive a Transparent logo, a white logo, and a black logo to fit with different backgrounds.
- You will receive 3 examples to choose from.
- The logo will be in a High-resolution format so that it will never pixelate or blur when used on your content.

**(Please send us everything in a Microsoft Word document if possible and add all attachments via email.)**
